

Bird Barn

22.6.11

What a great turnout we had at Bird Barn. The children really enjoyed being up close to the birds and a few children had an opportunity to have a bird sit on their shoulder, it was very exciting and delightful to observe the children's faces as the bird wondered around their shoulders and at times on their head.

The children had a chance to experience different types of birds and a lot of rich and valuable conversations took place. The children and educators discussed the different colours of the birds and the sizes of the birds as well as the sounds the birds made.

After the bird barn we headed to the pet shop and saw lots of puppies and very strange and interesting looking lizards, again some children had a chance to touch the lizard with a little bit of hesitation.

The Bird barn is a great place for the children to explore and investigate lots of different animals in a safe and secure environment, it was a fabulous morning.
